

MOBILIUM

MOBILE DEVICE MANAGEMENT

Manage Your Android Devices Like a Pro

Control 1 device or 100,000 — deploy, monitor, and secure your fleet in minutes.

SECURE

SCALABLE

SEAMLESS

Tailored for SMBs & Enterprises | Quick Setup | 24/7 Support

What is MDM?

Mobile Device Management lets IT deploy, monitor, configure, and secure Android devices at scale — from enrollment to enforcement, with no mandatory cloud.

70%

fewer manual IT tasks

100K+

devices, one console

24/7

remote access & support

100%

Android-optimized

Core capabilities: provisioning & enrollment · policy enforcement · app management · real-time monitoring · remote support · secure communication

Why Choose Mobilium

1 Zero IT complexity

QR-code enrollment — non-technical staff can deploy devices.

2 Private-network ready

Works offline and in air-gapped networks. No mandatory cloud.

3 Security built in

End-to-end encryption, anomaly detection, GDPR/SOC 2 tools.

4 Faster adoption

Intuitive launcher and dashboard your teams actually use.

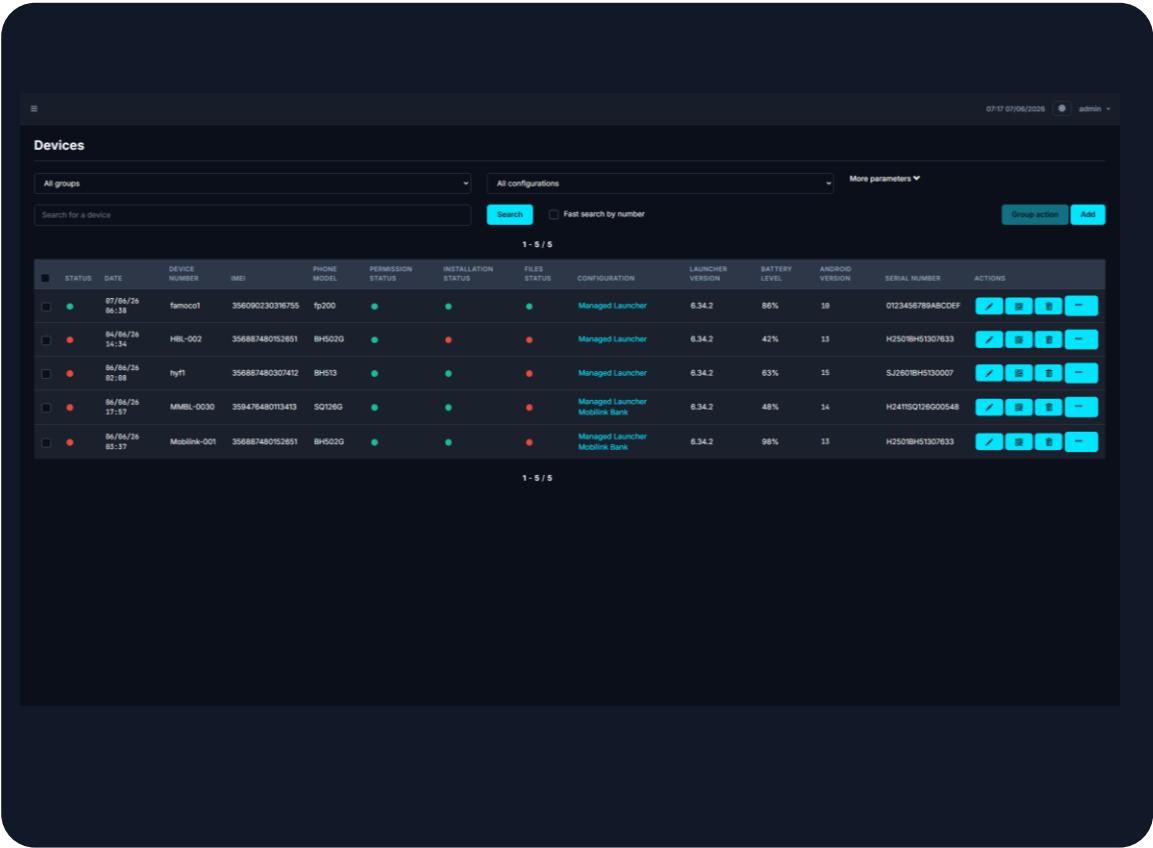

5 Expert guidance

Hands-on help from PoC to full production rollout.

6 Proven ROI

4–6 hours saved per device, per month.

Core Features

The screenshot displays the Mobilium admin dashboard's 'Devices' section. It features a search bar, filters for groups and configurations, and a table of device status. The table includes columns for status, date, device number, IMEI, phone model, permission status, installation status, file status, configuration, launcher version, battery level, Android version, serial number, and actions. Five devices are listed, each with a set of action buttons (lock, wipe, restart, etc.).

STATUS	DATE	DEVICE NUMBER	IMEI	PHONE MODEL	PERMISSION STATUS	INSTALLATION STATUS	FILE STATUS	CONFIGURATION	LAUNCHER VERSION	BATTERY LEVEL	ANDROID VERSION	SERIAL NUMBER	ACTIONS

Live fleet status — the Mobilium admin dashboard

Device Module

- **Automated Enrollment** zero-touch QR/email setup, hundreds in minutes.
- **Inventory Tracking** status, OS, battery, location (GPS/IP) in real time.
- **Remote Actions** lock, wipe, restart, enforce updates from anywhere.
- **Compliance Checks** flag cloned devices & outdated software instantly.

User Management

- **Self-Service Portal** enroll, reset PINs, request approvals in-app.
- **Device Association** link users to devices with lifecycle tracking.
- **Access Reviews** automated audits enforce least-privilege.

Scale With Structure

Group Module

- Dynamic grouping by dept, location, or role
- Bulk push of policies, apps & configs
- Nested hierarchies for fine-tuned control
- Usage analytics across groups

Role Management

- Prebuilt roles — Admin, Viewer & more
- Custom per-module permissions
- Inheritance & delegation to sub-users
- Activity logs for compliance

Reporting

- Interactive fleet-health dashboards
- Scheduled PDF/CSV exports for audits
- Custom queries by device, user, time
- Alerts tied to reports for fast fixes

Advanced Enterprise Features

On-Premise / Closed Network

Full functionality in air-gapped networks — data never leaves your infrastructure.

Custom Launcher

Branded kiosk launcher locks devices to approved apps only.

Role-Based Access Control

Granular admin permissions across teams and regions.

Deep Integrations

Knox framework, firmware-level integration, full API.

Use Cases

1

POS & Mobile Terminals

PCI-DSS-ready lockdown for payment and POS devices.

2

Corporate & Enterprise IT

Company + personal devices, policy at scale.

3

Banking & Financial Services

Encryption and compliance for financial data.

4

Retail & Field Workforce

App deployment & live monitoring for field teams.

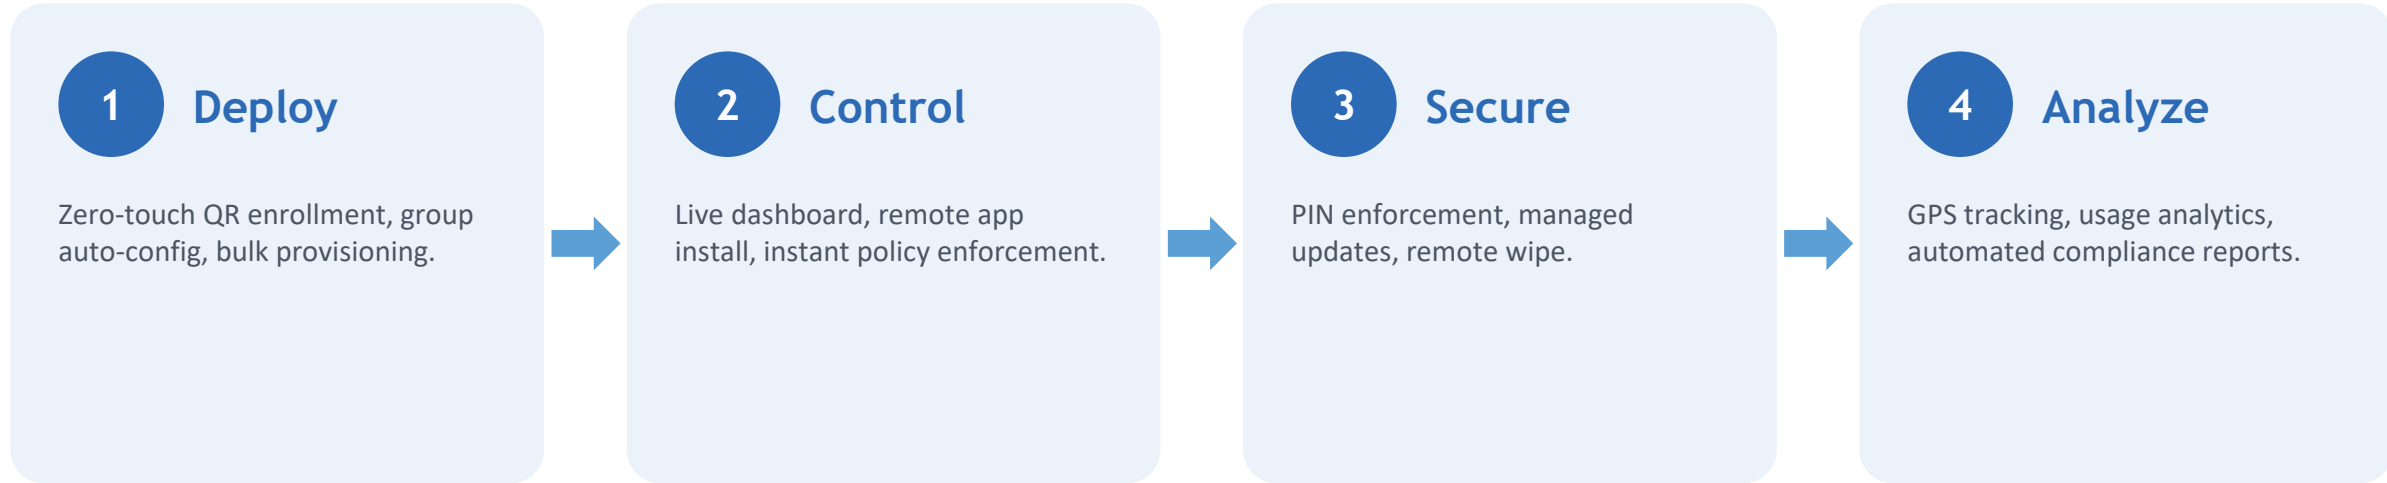

5

Logistics & Transportation

GPS tracking and rugged-scanner management.

Complete Device Lifecycle

Annual Maintenance – longevity built in

99.9% uptime SLA

priority issue resolution

Security & patches

proactive threat scans

Performance tuning

quarterly optimization

Backup & recovery

encrypted, tested restores

Built for Your Team

SMBs & Retailers

Streamlined operations

- Cost-effective per-device pricing
- Zero IT complexity
- Proven, measurable ROI

Enterprise & Logistics

Control at scale

- Unlimited device scalability
- Real-time fleet & GPS monitoring
- Advanced policy enforcement

Tech Companies

Peak performance

- Firmware-level integration
- Knox support
- Full API for custom workflows
